

# THREE CARD POKER STRATEGY CARD

ONE DECISION, ONE RULE

## THE ONLY DECISION: PLAY OR FOLD

- ✓ Raise (play) with **Q-6-4 or better**. Fold everything worse.
  - ? Read it high→low: compare your top card to **Q**, then 2nd to **6**, then 3rd to **4**. Equal-or-higher at the first difference → play.
  - ◇ Any **pair or better** → always play. Anything **Jack-high** → always fold.
- e.g.** Q-9-5 → play (9 > 6). Q-6-2 → fold (2 < 4). K-2-3 → play.

## THE NUMBERS

|                  |              |
|------------------|--------------|
| Ante-Play edge   | ~3.4% / ante |
| Per hand wagered | ~2.0%        |

## ANTE BONUS (AUTOMATIC)

|                 |     |
|-----------------|-----|
| Straight flush  | 5:1 |
| Three of a kind | 4:1 |
| Straight        | 1:1 |

## SIDE BETS

**Pair Plus** and 6-Card Bonus are fun but carry a big edge (~2-7%+). Bet small, or skip — they're not the strategy.
